

Datalogiens Videnskabsteori 2009

Litteraturliste

Henrik Kragh Sørensen

25. marts 2009

- Anderson, R. E., D. G. Johnson, D. Gotterbarn og J. Perrolle (1993, februar). Using the new ACM code of ethics in decision making. *Communications of the ACM* 36(2), 98–107.
- Bolter, J. D. (1986). *Turing's Man: Western Culture in the Computer Age*. London etc.: Penguin Books. Først offentliggjort: 1984.
- Cross, T. (2006, juni). Academic freedom and the hacker ethic. *Communications of the ACM* 49(6), 37–40.
- Denning, P. J. (2005, april). Is computer science science? *Communications of the ACM* 48(4), 27–31.
- Denning, P. J. (2007, juli). Computing is a natural science. *Communications of the ACM* 50(7), 13–18.
- Devlin, K. (2003, september). Why universities require computer science students to take math. *Communications of the ACM* 46(9), 37–39.
- Ensmenger, N. L. (2003). Letting the “computer boys” take over: Technology and the politics of organizational transformation. *International Review of Social History (IRSH)* 48(Supplement 11), 153–180.
- Hansen, T. B. og M. W. Johansen (2007, maj). Post-akademisk videnskab. *Aktuel Naturvidenskab* (2), 30–33.
- Hardaway, D. E. (2005, august). Sharing research in the 21st century: Borrowing a page from open source software. *Communications of the ACM* 48(8), 125–128.
- Johansen, M. W. (2003). At tænke eller ikke at tænke. *Aktuel Naturvidenskab* (2), 34–36.
- Johnson, D. G. (2001). Philosophical ethics. I *Computer Ethics* (3. udg.), kapitel 2, pp. 26–53. Upper Saddle River (NJ): Prentice Hall.
- Klüver, P. V. (1999). From research institute to computer company: Regnecentralen 1946–1964. *IEEE Annals of the History of Computing* 21(2), 31–43.
- Kragh, H. (2003). Hvad er videnskab? I *Universitet og Videnskab. Universitetets idéhistorie, videnskabsteori og etik*, kapitel 3, pp. 145–192. København: Hans Reitzels Forlag.

- Küppers, G., J. Lenhard og T. Shinn (2006). Computer simulation: Practice, epistemology, and social dynamics. I J. Lenhard, G. Küppers og T. Shinn (red.), *Simulation: Pragmatic Construction of Reality*, bind 25 af *Sociology of the Sciences Yearbook*, kapitel 1, pp. 3–22. Dordrecht: Springer.
- Lohsee, J. (1993). Theories of scientific progress. I *A Historical Introduction to the Philosophy of Science*, kapitel 14, pp. 222–236. Oxford & New York: Oxford University Press.
- Mackenzie, D. og G. Pottinger (1997). Mathematics, technology, and trust: Formal verification, computer security, and the U. S. military. *IEEE Annals of the History of Computing* 19(3), 41–59.
- Mahoney, M. S. (2001). Software as science—science as software. I U. Hashagen, R. Keil-Slawik og A. Norberg (red.), *History of Computing: Software Issues*, pp. 25–48. Berlin etc.: Springer. International Conference on the History of Computing, ICHC 2000. April 5–7, 2000, Heinz Nixdorf MuseumsForum, Paderborn, Germany.
- Merz, M. (2006). Locating the dry lab on the lab map. I J. Lenhard, G. Küppers og T. Shinn (red.), *Simulation: Pragmatic Construction of Reality*, bind 25 af *Sociology of the Sciences Yearbook*, kapitel 10, pp. 155–172. Dordrecht: Springer.
- Parberry, I. (1989). A guide for new referees in theoretical computer science. *ACM SIGACT News* 20(4), 92–109.
- Ralston, A. (2005, juni). Do we need *Any* mathematics in computer science curricula? *ACM inroads: The SIGCSE Bulletin* 37(2), 6–9.
- Raymond, E. S. (2000). Katedralen og basaren. Oversat af P. Makhholm og D. Axel. www.catb.org/~esr/writings/cathedral-bazaar/, checked 2007/03/21.
- Slayton, R. (2003). Speaking as scientists: Computer professionals in the Star Wars debate. *History and Technology* 19(4), 335–364.
- Strom, J. D. og L. Darden (1996). Is artificial intelligence a degenerating program?: A review of Hubert Dreyfus' *What Computers Still Can't Do*. *Artificial Intelligence* 80(1), 151–170.
- Wing, J. M. (2006, marts). Computational thinking. *Communications of the ACM* 49(3), 33–35.
